

## Teens and Adults with Autism Needed for Study Using Virtual Reality

### WHAT ARE THE GOALS OF THIS RESEARCH STUDY?

The purpose of this research study is to test whether new virtual reality technology and interactive gaming applications can help to improve social skills in teens and adults with autism spectrum disorder (ASD).

### WHO CAN BE A PART OF THIS RESEARCH STUDY?

Teens and adults (age 12 and up) with a confirmed diagnosis of autism spectrum disorder.

### WHAT WILL PARTICIPANTS BE ASKED TO DO?

- Make one to three visits to CHOP
- Wear virtual reality headset and play interactive games
- Complete questionnaires

### WHAT WILL PARTICIPANTS RECEIVE IN THIS RESEARCH STUDY?

You will receive compensation for your participation.

### I WANT TO HELP! WHO DO I CALL?

If you are interested in participating in the study or want to learn more about it, please contact:
