

## INFANTS WITH OLDER SIBLING NEEDED FOR BRAIN DEVELOPMENT STUDY

### WHAT ARE THE GOALS OF THIS RESEARCH STUDY?

The goal of this research study is to identify key differences and similarities in brain development between infants with an older sibling who either does or does not have autism spectrum disorder.

### WHO CAN BE A PART OF THIS RESEARCH STUDY?

Infants aged 6 months with an older sibling.

### WHAT WILL PARTICIPANTS BE ASKED TO DO?

- Make 3 visits to CHOP over time
- Complete behavioral and cognitive testing
- Undergo a non-invasive MRI

Participants are compensated for their time and will receive a written report on all measures.

### I WANT TO HELP! WHO DO I CALL?

If you are interested in participating in the study or want to learn more about it please contact:
