**What are the goals of this research study?**

The goal of this research study is to identify unique characteristics in the way kids and teens with Autism Spectrum Disorder (ASD) speak in comparison to typically developing peers.

**Who can be a part of this research study?**

We are looking to partner with children and adolescents ages 6-17 with a confirmed diagnosis of autism spectrum disorder and typically developing children and adolescents.

**What will participants be asked to do?**

In response to the COVID-19 pandemic, all study activities may be completed from home. Participants will be asked to complete questionnaires, as well as weekly language-based activities 7 times.

You will receive compensation for your participation. Upon request, you will receive a clinical report detailing assessment results.

**I want to help! Who do I call?**

If you are interested in participating in the study or want to learn more about it please contact:
